Mr. Jimmy Carter
Chief, Hazardous Waste Section
North Carolina Department of
Environment and Natural Resources
Post Office Box 27687
Raleigh, North Carolina 27611-7687

Dear Mr. Carter:

In accordance with the RCRA Part B Permit held by the Marine Corps Air Station, Cherry Point, notification was made to the North Carolina Department of Environment and Natural Resources and the U.S. Environmental Protection Agency on June 26, 1997, concerning a newly discovered Solid Waste Management Unit (SWMU), designated as Site 84. Site 84, Golf Course Maintenance Area, was identified because of the potential of a release to the environment from past waste disposal activities. The SWMU was composed of discarded solid waste materials such as, golf course signs, bowling pins, tractor tires, scrap wood, yard debris, and approximately 50 lead-acid batteries. With the exception of one battery, all were found in an upright position and in good condition.

Brown and Root Environmental was contracted to prepare the SWMU Assessment Report (SAR) in accordance with the requirements of our Part B permit. Enclosed for your review is the final SAR for Site 84. Based on the findings of this report, it is concluded that this site has little potential for adverse affects on human health and the environment. As a result it is requested that no further actions are warranted at this site.

If you have questions or require additional information, please contact Bill Powers of the Environmental Affairs Department at (919) 466-3663.

Sincerely,

A handwritten signature in cursive script, reading "Christine E. Kartman", is written above the typed name.

CHRISTINE E. KARTMAN
Supervisory Environmental Engineer
By direction of
the Commanding General

Enclosure: 1. Final SAR for Site 84
